With the passion to give the best,
We are ready for the better future together.*

The Group

As one of Indonesia’s most respected group of companies, Maspion Group today is a big enterprise with 30,000 employees spread in its five industrial sites and factories in East Java and Cibitung, Jakarta. From its origin as a kitchenware manufacturer in 1967, today Maspion Group has enlarged its business into eight business groups: Consumer Products, Consumer Industrial Products, Construction and Building Material, Hotel, Commercial Property and Industrial Estate, Banking, Trading and Distribution, Infrastructure and Energy, and Miscellaneous Businesses. In addition to developing its own companies, Maspion Group has attracted a number of multinational corporations to be joint venture partners.

Driven by the strong spirit of entrepreneurship, Mr. Alim Husin, the founder, has realized his vision of turning Maspion Group into a prominent business group in Indonesia. He has been supported by his sons, initially by his eldest son, Alim Markus, which then followed by the other three sons, Alim Mulia Sastra, Alim Satria, and Alim Prakasa. A number of independent executives also dedicated their efforts to the success of Maspion Group.

Through the dedication and hard work of its entire employee, Maspion Group continues to improve reliable economic performance that ensures a sustainable enhancement of its shareholders’ values and contribution to the Indonesia’s economic development.

Maspion Group is truly Indonesia’s Pride.

Vision (The Logo)

The Logo of Maspion Group, which depicts the figure of three leaves sprouting from a common stem, symbolizes the Group's basic Corporate Values:

Developing Human Resources

Human resources is the important asset. We believe in the environment that will create an atmosphere of continuous learning, continuous improvement and shared values to nurture a strong and united team.

Progressing with All Our Stakeholders

The customers, the shareholders, the employees, vendors, community, local and central government are our stakeholders wherever we conduct our business throughout the world, whose diversities and common goals contribute to the progress and bring larger value creation for all.

A better future

To create a better future for all our stakeholders and prosper together to serve the community and the nation through the business development.

Beloved Founder

Mr. Alim Husin established the solid foundation of the Group back in the year 1967 by setting up UD Logam Jawa, the aluminium kitchenware home industry. Prior to setting up this Company, Mr. Alim Husin who migrated from China to Indonesia at the young age was involved in a number of business ventures and setting up small businesses. In 1971, PT Maspion and followed by PT Indal Aluminium Industry in 1972 were established under the domestic investment scheme (PMDN) that represent the thrust of the business expansion in a large scale and at the same time merging Logam Jawa into PT Maspion. From this humble beginning with his strong spirit, enthusiasm, persistence, hard work, and entrepreneurial vision, Maspion Group has now developed into one of the largest and prominent business groups in Indonesia.

Mr. Alim Husin appreciation of the employees' contribution to be part of this success has yielded into loyal and dedicated employees. His spirit of love and respect for his work often moves people. The Group's business stature and success today has become the concrete evidence of his legacy.

Mr. Alim Husin passed away in October 2003, and left so many memorable memories which have inspired the whole Maspion Group to continue developing and transforming the Group into one of the leading and prominent business groups in Indonesia. His legacy would lie deep and become the cornerstone of the Group's strive towards the future.

Mr. Alim Husin
The Founder

Mission

Market leadership and optimized customers' value by meeting and even exceeding customers' expectation.

Strategic Direction

Delivering Customer Satisfaction

Customer satisfaction is the heart of the business. We embrace the opportunity to provide products and services to meet and even exceed customers' expectations today and anticipate their needs of tomorrow.

Growth with Strategic Long Term Objectives

Growth is started from the ability to see, to create business opportunities, and cost efficiency. It is important for us to become the most competitive business force in all areas which target is to become the leader in the industry, and eventually to have the biggest share in the market.

The Values and Rules

To create a better future for all our stakeholders and prosper together to serve the community and the nation through the business development.

Compliance to The Law, Rule and Regulation

It is expected that everyone of Maspion's employee will adhere to the law, rule and regulation of the country and be a law abiding citizen to ensure a law abiding corporation.

Creating Clean and Green Business and Products

Best company should be responsible toward the society and the larger community. By creating clean and green businesses and products, the Company would be able to serve its real purpose in the community in a long term horizon.

Loyalty, Capability, Hard Work, and Discipline

Form the pillars of success and achievement. Each member of the organization should preserve his/her integrity and be prepared to work hard and smart for the common benefits of the company and the individuals. The conduct of the organization should be carried out in the manner of military discipline but the approach should still be humane.

A word from the President Commissioner

Maspion Group has been founded from the vision of Mr. Alim Husin in 1967. Since then the Group has grown tremendously into this day as one of the prominent business forces in the country. I am grateful to God for His countless blessings, and also to everyone who has contributed to the success of this endeavour. I would also like to recognize the commitment, hard work, skills, and dedication of many employees who have turned the early vision of making the Maspion Group a prominent business group into a reality. To that end, I would like to extend my deepest appreciation to the business partners, management team, and all the employees of Maspion Group who have contributed to its success. We look forward to facing the many challenges that still lie ahead. I call upon everyone in our extended family to uphold the values of unity and togetherness, motivation, and hard work in order to make an ongoing contribution to the Group and development of our beloved country, Indonesia.

Angkasa Rachmawati
President Commissioner

Message from the President Director

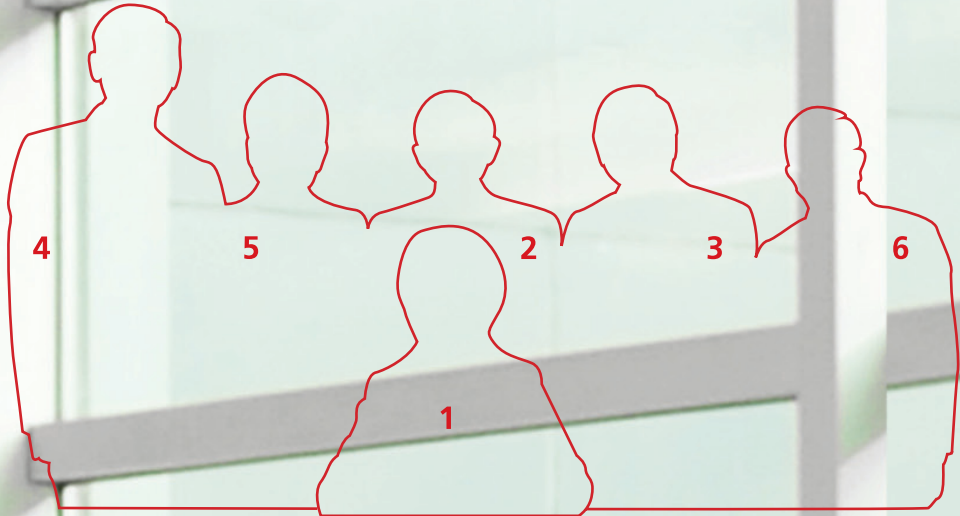

Changes in the business environment mean not only challenges, but also opportunities to those with vision, ability, and resources to take advantage of them. Because the key to past success does not always guarantee a winning formula for tomorrow, we must always be proactive in anticipating changes to capitalize on the challenges and opportunities that lie ahead.

Globalization is a reality today, through which national boundaries lose their economic significance. This will have the effects of reducing import barriers and free flow of goods among countries.

To benefit from these opportunities, we must remain alert in order to make quick but well informed business decisions. To meet the challenges that lie ahead, we must continue to evolve in terms of technology, efficiency and human resources. We must also maintain and cherish our Corporate Culture at all times by focusing on customer's satisfaction, solid growth and profitability, human capital, productivity and alliances.

Indonesia's Pride

Indonesia, the largest archipelago in the world of 17,508 islands, has been showing a sustained healthy economic growth throughout the years and cementing its position as a global powerhouse.

Indonesia, the largest economy in South East Asia and member of the twenty largest economies in the world (G-20), with its abundant natural resources, large and youthful domestic market and stable political environment is a force to be reckoned with.

Indonesia's Maspion Group with its diversified yet focus and competitive businesses is ready to meet the challenges that the globalization presented and grab the opportunities that the Indonesia's middle class and emerging economy offered, to further contribute towards the welfare of the people and prosperity of our beloved country, Indonesia and be a truly

Indonesia's Pride

Beyond the Business

Maspion Group believes that Corporate Social Responsibilities is part of corporate culture and begins at home and belongs wherever it operates. This serves shareholders' interests, just as it benefits the people and country that hosts the Group.

The Group long term success depends on its ability to generate attractive returns for shareholders. To achieve this, the Group must be a trusted neighbor and partner in the growing communities it serves.

It must be a steward of the environment and leader in the commitment to safety, community, and people education.

We strives to be the partner of the choice in life of our customers, employees, business partners, and other social members of the community, by offering not just our products and services, but also offering partnership in every area of life. We constantly strive to deliver continuing employments to the society, to spur the economic development of the community.

**PT Piaget Jatim Pratama
Singapore National Academy
International School**
